

## **Abstract**

This thesis analyses selected program documents of the Czech Pirate Party for the period 2009-2017 in terms of content of its themes. Specifically, these are the Statute and all election programs created at that time. The aim of the thesis is to determine whether the program development of the Czech Pirate Party occurred during the monitored period. From a methodological point of view, this is a content analysis supplemented by a comparative method. The thesis is based on the characteristic of the theoretical concept of the niche party, which will be presented in the first, theoretical part of thesis. The second part of the thesis takes a closer look at methodology. The third and at the same time the most comprehensive part deals with the introduction of pirate parties and the Czech Pirate Party, the actual content analysis of selected program documents and the subsequent comparison.
